

Dear Casey & Wanyi,

I am your neighbor at 10151 Phar Lap Dr. You might be aware of the trap-neuter-return efforts (TNR) that have been going on in the neighborhood. We have fixed and rescued a total of 21 cats and kittens (see cupertinocats.org). There are two known cats remaining.

One has a litter of kittens, now 3 weeks old, and she is entering the side yard of your neighbor's house and going up the hill. We are going to get the kittens into a foster home with Dancing Cat rescue. We are going to catch the mom, get her spayed, vaccinated (including rabies), dewormed, and given flea medicine. The goal is to stabilize the population of cats so they are not having litters every 2 months and to get them healthy and vaccinated.

I am asking for permission to search your yard after I trap the mom (one day between Oct 16-20). We believe she is in one of the backyards below. I will give you a heads up as soon as we trap her, since we will start kitten searching a few hours later. If you wish, you may adopt one (or more) of the kittens or outdoor cats, after they receive veterinary treatment.

Stella

If you notice any cats or kittens around your house, or if you have been leaving food out for them, please contact me at cupertinocats@gmail.com or 408-892-1049. We don't want her to move the kittens, so please do not chase or follow her or search the yard until we have caught the mom.

Read more about the reasons behind these efforts: alleycat.org/TNR.

Here are a few photos of the last kittens we rescued, and we hope to get these next little ones in wonderful homes, too!

Your neighbor,
Vanessa Forney (from 10151 Phar Lap Dr)
